

## Management Pack For MOM 2005

# Comprehensive auditing and reporting support for MOM 2005

AppSense Management Suite comprises a set of integrated product components designed to secure, manage and optimize your IT infrastructure.

The AppSense Management Pack for Microsoft Operations Manager (MOM) 2005 integrates a comprehensive set of auditing events for all the components in the AppSense Management Suite.

## Management made easy™

The AppSense Management Suite automatically resolves performance and security issues as they occur. The AppSense Management Pack has been designed to integrate the powerful AppSense Auditing component into MOM 2005. Using simple event processing rules, the AppSense Management Pack can filter all the events generated by the Auditing System and alert the Administrator to performance issues or potential security threats through the State View feature of MOM 2005.

In addition, the AppSense Management Pack includes a comprehensive knowledgebase that provides the Administrator with information and help on how to best configure the AppSense solution for optimal security and performance.

The AppSense Management Pack is available free of charge to all AppSense customers that have a valid software subscription agreement.

## Key features

- AKM file for easy import into the MOM 2005 database
- Automatic forwarding of potential security threats or performance issues to the AppSense Administrators Notification group within MOM 2005
- Automatic identification of any AppSense controlled computer
- Comprehensive knowledgebase providing information and troubleshooting tips for issues raised through MOM 2005
- Event processing rules for all AppSense Management Suite agents
- Monitors Windows Event Log events generated by the AppSense Auditing Agent
- Performance rules to capture performance data for any computers controlled by AppSense Performance Manager
- Performance rules to monitor AppSense Management Suite agents
- Public views for monitoring individual components of the AppSense Management Suite
- State views giving a visual representation of the health and state of all AppSense Management Suite agents

## Key benefits

- Critical performance and security alerts provided in MOM 2005 State View
- Simple to install and configure
- Increases ROI and reduces IT management costs

## Our Solutions

AppSense Management Suite comprises a set of integrated product components

### AppSense® Application Manager

Automatically eliminates unauthorized applications and controls application access

### AppSense® Environment Manager

Centrally set-up, lock-down and self-heal user environments

### AppSense® Performance Manager

Dynamically manages system performance, availability and capacity
